INVENEO ANNOUNCES DOMINIC ORR JOINS BOARD

Successful Silicon Valley Networking Entrepreneur and Executive Brings Technology and Scaling Expertise to Non-profit Tech Start-up

San Francisco, California. March 9, 2006 - Inveneo Inc., a non-profit social enterprise, announced today that Dominic Orr has been named as the first outside member of the Inveneo Board of Directors.

Mr. Orr, currently Chairman of the Board of Aruba Networks and Executive Chairman of Ruckus Wireless, is the founder of several highly successful networking companies in the Bay area including Alteon Networks and Netgear. He also had leading roles in several major networking companies including that of President, Content Networking Business Unit, Nortel Networks.

“Dominic is an outstanding addition to Inveneo’s board,” said Mark Summer, Inveneo CEO. “He has extensive experience taking complex networking technologies and simplifying them for new users, and a strong reputation for building successful start-ups. This will be a tremendous asset for Inveneo as we begin to scale to deliver innovative, cost effective Information and Communications Technology (ICT) solutions for Non-Government Organizations (NGOs), local governments and private entities providing development services in rural and remote environments.”

“It’s very exciting to take communications technologies which have such a profound impact on our daily lives and bring them within the reach of rural and remote communities around the world and the organizations who serve them,” said Dominic Orr. “I am thrilled to be a part of this socially minded team positioned to make a major economic and social impact in the developing world.”

About Inveneo (www.inveneo.org)

Inveneo is a San Francisco-based, non-profit social enterprise whose mission is to empower people in remote and under-served communities, and the organizations that serve them, through access to computing and communications. We design, integrate, and deploy affordable, sustainable, and open Information and Communications Technology (ICT) solutions for rural environments. Inveneo partners with local Non-Governmental Organizations (NGOs), local governments, and private enterprises to deliver solutions for development, telehealth, relief, and education applications.

Our team has created the first affordable, solar-powered, easy-to-install system for building Internet and telecommunications networks in rural areas with little or no access to electricity or other affordable communications infrastructure.
