

Inveneo Desktop Linux 2.1

The easy-to-use computer operating system and software applications for rural installations

Inveneo Desktop Linux 2.1 is designed for computer users and administrators in shared-use computing environments, such as schools and telecenters. Inveneo Desktop Linux is free, open source, and ships with the software required for most computing applications.

Inveneo Desktop Linux 2.1 is designed to be easy to deploy, and easy for novice computer users to use in rural locations. To protect the computer from accidental infection or corruption, the system is locked down. Restarting the computer erases any changes or downloaded malware.

Based on Ubuntu Linux, Inveneo Desktop Linux 2.1 is virtually immune to viruses. This makes it easy to keep a computer center up and running with little administrative oversight.

The simple, friendly interface makes Inveneo Desktop Linux ideal for beginners, yet the integrated applications make it useful for most business tasks.

What's New for Version 2.1

- Multi-language software and keyboard support (English, French, Spanish, Portuguese)
- Klavaro Multilingual Touch Typing Program

For Computer Users

For computer users in shared-use computing environment, Inveneo Desktop Linux 2.1 features:

- Firefox web browser, with built-in Adobe Flash and embedded media player.
- OpenOffice office productivity software with word processing, spreadsheet, presentation, and publishing applications.
- Skype and instant messaging software so people can communicate quickly and easily with others around the world.
- A PDF reader, multimedia player, and photo viewer so users can easily receive and gather information from standard-format media.
- Klavaro multilingual touch typing tutor to help students and novice users improve their typing skills.

For Administrators

For administrators in shared-use computing environments, Inveneo Desktop Linux 2.1 features:

- Locked-down system software which makes it impossible for novice users to corrupt. Restarting erases changes and removes any viruses or other malware.
- Auto-configuration of Inveneo desktop computers when used with Inveneo Hub Servers.
- Easy restoration to factory settings.
- Easy configuration for French, Spanish, Portuguese, or English system languages and keyboard layouts.
- Simple GUI configuration for printers and scanners.
- Plug-and-play configuration of Inveneo-approved peripherals.
- Intelligent interface makes it easy to connect to WiFi or wired networks safely.
- Remote desktop with RDP and VNC protocols.

Inveneo Desktop Linux 2.1 Specifications

Inveneo Desktop Linux 2.1 Bundled Software

- OpenOffice suite
Office productivity suite (compatible with standard file types)
 - Writer word processing solution
 - Calc spreadsheet solution
 - Impress presentation solution
 - Draw publishing solution
- Firefox web browser
The award-winning web browser from Mozilla
