Inveneo’s Social Impact

We design and deliver technology and programs to transform lives through better education, healthcare, economic opportunities, and fast emergency relief.

Since 2006, Inveneo and our 120+ ICT Partners have delivered solutions to more than 3.2 million people in over 1,900 communities in 31 countries across the developing world.

We deliver technology and programs to accelerate impact of development.

Serving education, healthcare and economic development organizations, accelerating their programs by integrating sustainable ICTs.

Building local capacity to deliver and support projects, by training and partnering with ICT entrepreneurs.

Integrating hardware, software and power solutions, expertly designed for challenging environments with harsh climates and unreliable power.

Delivering results at scale via deep technical expertise, local partners and a firm understanding of the challenges endemic to the developing world.

Inveneo's Social Impact

- 3.255,670 People
- 1,920 Communities
- 31 Countries
- 128 Partners

A non-profit that delivers the tools of technology to those who need it most across the developing world.
Studies conducted in recent years have underlined that rising broadband take-up stimulates job creation, GDP growth and social inclusion. Healthy and sustainable societies will be those that prize the role of ICTs and are committed to nurturing their development.

Inveneo Program Highlights

Rapid Response in Humanitarian Relief
- Hurricane Maria Response in Puerto Rico. Inveneo assisted NetHope on the ground by supporting the arrival of equipment, aiding in its delivery to warehouses, and much more.
- Haiti Earthquake Response. Restored broadband communications within days after the earthquake for major NGOs providing rescue and relief services. Partnered with NetHope and The EKTA Foundation.

National and Regional Broadband Access
- Haiti Connected Cities Initiative. Partnered with Internet Service Providers and ICT entrepreneurs to deploy a network reaching 22 population centers, over 25% of rural Haiti.
- Internet Now! Took the lead in the project in accelerating the site identification and survey process. Inveneo’s engineering team estimated that 120 sites in Uganda would have to be surveyed.

Deployment at Scale
- Micronesia Schools. Deployed a solar-powered digital library training to Peace Corps volunteers in 2015, who will reach 20 schools and 20,000 end users throughout the country.
- Uganda Schools. Deployed solar-powered computing to 700+ rural schools. Led by local partner, CLS. Funded by the Ugandan government through its Universal Service Fund.

A Global Ecosystem of ICT Experts
- Inveneo has more than 120 ICT entrepreneurs from around the globe that benefit from Inveneo’s local business ecosystem, innovative certification programs, and vibrant community of practice.
- The Inveneo Certified ICT Partner (ICIP) programs have served 24 countries around the world.

Inveneo is a Berkeley-based 501(c)(3) non-profit social enterprise that designs and delivers sustainable computing and better access to broadband Internet to those who need it most in the developing world. Inveneo enables organizations working in developing areas to better serve people in need transforming lives through access to education, healthcare, economic opportunity, and emergency relief. Inveneo and its partners have delivered projects in 31 countries and is impacting the lives of more than 3 million people in some of the poorest and most challenging regions in the developing world.

Clients and Supporters

We work with funders and organizations focused on development — ranging from non-governmental organizations engaged in vital service delivery, to large multilaterals and government agencies — to reach some of the poorest communities in the world, connecting them to access to services, opportunity and the world.
